Vecco Campaign Restriction Newsfeed (6/6)

Cr(VI): Public Consultation

Dear Vecco members,

Due to numerous requests, we have published an information video on how to participate in the public consultation, which you can view at the following button.

The video contains the necessary links and references to some practical tools we have developed for you. Finally, we will go through the comments with you live using an example AI prompt.

The video, argumentation templates and AI prompts are only available in German. International members who would like to comment are kindly requested to contact us directly. We will work with you to prepare a comment in English together.

Another special feature is the topic of decorative uses and, specifically, plating on plastics (UC2). The separate question 16 in the questionnaire seems to put this sector in a special light. In order to coordinate the common interests of our members in this area, we are hosting a webinar on Thursday, 31 July at 2 p.m. entitled ‘Support for decorative applications in the restriction’. A separate invitation will be sent to all decorative users.

We hope that this video and the guidance provided will make it easier for you to submit your comments. Please take part in the public consultation. This is your chance to influence the future of Cr(VI) regulation in Europe.

Vecco Executive board

We hereby explicitly point out that the draft restriction is a proposal whose content may still change during the political decision-making process. All information contained in this summary is the interpretation of Vecco e.V. and does not represent statements made by ECHA.
